

## VERTICAL GARDEN SOLUTIONS PLANTER GARDENS

# GO UP THE WALL WITH HANGING GARDENS

We specialise in the design and installation of green walls and green facades for commercial and residential properties and public spaces. Vertical gardens are used as focal points, screens and living skins in buildings, homes and public spaces to beautify and green up urban areas.

# PLANTER GARDENS

This system is a light weight method of installing vertical gardens where no penetration of substrates is permitted and where semi-transparent vertical gardens and space dividers are required.

**PLANTER GARDENS**

**Planter Gardens** use light weight, soil based pocket gardens in a self contained, module. They are ideal for exterior application and space dividers. They are perfect as semi-transparent space dividers and wall units.

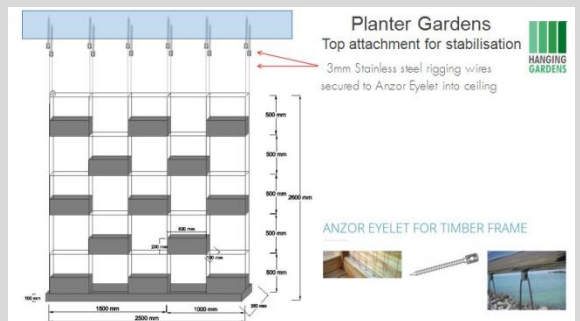

**COMPONENTS**

The modules come with a powder-coated planter boxes, a drip tray and automatic irrigation. The frame is a marine grade stainless steel and can be powder-coated. Plants are planted into our felt pockets and inserted into the planters.

**STANDARD SIZES**

The Planter Gardens have planter boxes 500mm wide, 200mm high and 180mm deep, which is perfect for three plants. The modules come in sizes 1m and 1.5m by 2.6m high and can be linked to form larger gardens.

**STABILISATION**

To stabilise the modules, the Planter Gardens are secured at the top to structural supports by adding 3mm marine grade stainless steel rigging wires and securing these wires to the structural elements of the building.

# PLANTER GARDENS

## PLANTS

The plants are delivered to site pre-planted into our unique botanical felt pockets. These removable felt pockets increase moisture retention and aeration of the roots and aid plant health. Ongoing maintenance allows for pockets to simply and quickly be swapped about.

## IRRIGATION

Automatic irrigation is connected to a water mains supply or rainwater collection tanks. Watering is generally water conserving and drip fed. This approach delivers low operating costs and water management benefits. Zone control and rain sensors can be applied as required.

## BESPOKE SIZES

Planter Gardens can be designed to fit any dimensions and can powder-coated to any colour. For more details please do contact us.

## BENEFITS

- The benefits of this system are:-
- Quick and easy installation
  - Low operating costs
  - Low maintenance costs
  - Improved air quality, productivity and health
  - Semi-transparent screens
