

VERTICAL GARDEN SOLUTIONS

Garden Design

GO UP THE WALL WITH HANGING GARDENS

We specialise in the design and installation of green walls and green facades for commercial and residential properties and public spaces. Vertical gardens are used as focal points, screens and living skins in buildings, homes and public spaces to beautify and green up urban areas.

Garden Design

At Hanging Gardens we are all about delivering beautiful garden solutions that make the most of unique and under-utilised spaces.

TRANSFORMING SPACES

With increased urbanisation, the traditional garden is becoming a luxury. The size of garden spaces is decreasing while vertical spaces in urban areas are under utilised. Using vertical gardens is a wonderful way of giving the look and feel of a large garden in a small space.

UNIQUE FEATURE

Our designs focus on the enhancement of existing features to increase the enjoyment and value of your property. Our innovative Hanging Garden solutions enable the maximum use of outdoor spaces while still allowing for a lush green environment.

DESIGN

Every Hanging Garden is designed in consultation with our clients and customised to make the best of the site features. We like to start by getting to know you and your project, so we get a really good understanding of your requirements and what you are looking to accomplish.

PROCESS

We undertake a site visit and follow up with a preliminary concept and proposal for your garden that reflect your preferences for colour, species, depth and other parameters. This can include recommendations on every factor from garden style to plant selection and irrigation.

POCKET GARDENS

EXAMPLE - EXTERIOR

Hanging Gardens is considered to be at the forefront of vertical gardens and green technology innovation. Our gardens are designed to be long-lasting, sustainable and highly resilient to seasonal climate changes. Throughout the process, our professional, friendly team will provide you with a truly personalised service.

EXAMPLE - INTERIOR

We work alongside our clients to design and customise each garden to make the best of the site features. We can assist with all aspects of the design of gardens to beautify residential developments, homes and buildings to improve the urban environment. We can extend the garden into the home or turn your garden into another room.

EXAMPLE - EDIBLES

Our vertical garden solutions are soil based and ideal for a wide range of plants including New Zealand natives, annuals, perennials, exotic sub-tropicals, herbs, vegetables, other edibles and any plant that will grow in a container. We have horticultural experts who can advise on plant selection to suit your site and your preferences.

EXAMPLE - APARTMENTS

Our team includes an award-winning landscape designer and we offer an end-to-end service including garden design, plant selection and sourcing, manufacture, installation and maintenance. Our expertise acquired over many years means we are well equipped and focused to deliver on budget and with no surprises.
